iPad mini with Retina display is amazing to hold. And behold. Every photo is incredibly detailed and vibrant, and every line of text is remarkably crisp and clear. With higher resolution than an HDTV, it's stunning - on a whole new scale. iPad mini keeps you connected faster than ever. In more locations than ever. Using two antennas instead of one and MIMO technology, iPad mini delivers twice the Wi-Fi performance of its predecessor. Any way you look at it, iPad mini is just incredible. And the stunning Retina display is only the beginning. With an A7 chip, advanced wireless, and powerful apps - all beautifully integrated with iOS 7 - iPad mini with Retina display lets you do more than you ever imagined. Now iPad mini looks even more brilliant in your hand. The Retina display has over 3.1 million pixels - a million more than an HDTV. That's a 2048-by-1536 resolution, four times the resolution of the previous-generation iPad mini. In fact, the pixels are so close together, your eyes can't distinguish them. So photos and videos show incredible detail and text is razor sharp. Because the best pixels are the ones you never see. Apple packed so many incredible features inside iPad mini. It has a stunning Retina display, the incredibly powerful A7 chip, advanced wireless technologies, and more. Yet it's still thin and light (and mini). So while you can do even more, you won't feel like you're holding any more.
