Cisco ATA 188 - VoIP phone adapter - 100Mb LAN

The Cisco ATA 188 Analog Telephone Adaptor interfaces regular telephones with IP-based telephony networks. The Cisco Analog Telephone Adaptor products are standards-based communication devices that deliver true, next-generation voice-over-IP (VoIP) terminations to businesses and residences worldwide. These products address the needs of enterprise companies, small-office environments, and the emerging VoIP managed voice services and local services market by helping companies to cost-effectively turn their analog telephones into IP devices. The newest member of the Cisco ATA product family, the Cisco ATA 188, provides added connectivity, features, and ease of administration.

Specifikation

General

Status	N2
Device Type	VoIP phone adapter
Width	16.5 cm
Depth	14.5 cm
Height	3.8 cm
Weight	425 g

Networking

Form Factor	External
Connectivity Technology	Wired
Data Link Protocol	Ethernet, Fast Ethernet
Network / Transport Protocol	TCP/IP
Remote Management Protocol	HTTP
Features	DHCP support
Encryption Algorithm	RC4

IP Telephony

VoIP Protocols	MGCP, SCCP, SIP
-----------------------	-----------------

Voice Codecs	G.723.1, G.729, G.729a, G.729ab, G.711u, G.711a
---------------------	---

Telephony Interfaces	2 phone (FXS)
-----------------------------	---------------

Expansion / Connectivity

Interfaces	1 x 100Base-TX - RJ-45 (WAN) 1 x 100Base-TX - RJ-45 2 x modem - RJ-11
-------------------	---

Miscellaneous

Compliant Standards	FCC Class B certified, VCCI Class B ITE, CISPR 22 Class B, EN 60950, ICES-003, IEC 60950, EN55024, UL 60950, EN50082-1, EN55022 Class B
----------------------------	---

Power

Power Device	External power adapter
---------------------	------------------------
