G-Technology ev Series Reader Atomos EVDRAMCECLWWAB - Master Caddy - storage enclosure - SATA, USB 3.1 (Gen 2)

Atomos creates easy-to-use solutions that merge recording, monitoring, and playback into a single touchscreen device that enables faster, higher quality, and more affordable video production. Designed to optimize and simplify your Atomos video workflow, the ev Series Reader Atomos Master Caddy Edition leverages high performance connectivity for fast Atomos content transfers and backup. It is the latest accessory in the Evolution Series of high performance, flexible storage solutions (not compatible with ev All-Terrain Case). Transfer content quickly from your Atomos recorder into any ev Series-compatible or other G-Technology storage solution. When shooting on-the-go, use it as a stand-alone device to review, log, and back up footage.

Specifikation

General
