HPE 3PAR 7200 Adaptive Optimization Base - Licence - 1 system - electronic

Do you want to optimize service levels effortlessly, on a large scale, and for a lower total cost than other solutions? The HP 3PAR Adaptive Optimization Software is a granular, policy-driven, autonomic storage tiering solution that delivers service level optimization for virtual and cloud data centers to reduce cost while increasing agility and minimizing risk. Adaptive Optimization Software delivers the next generation in autonomic storage tiering by taking a fine-grained, highly automated approach to service level optimization. Policy-driven, granular data movement takes place autonomically, providing highly reliable, non-disruptive, cost-optimized storage tiering at the sub-volume level to deliver the right QoS to the right data at the right time on a large scale.

Specifikation

General

Category	Networking applications - storage management
Product Type	Licence
Distribution Media	Electronic

Licencing

Licence Qty	1 system
