HP OneView without iLO Advanced - Flexible licence + 3 Years 24x7 Support - electronic - Linux, Win

HP OneView is a fresh approach to converged infrastructure management, inspired by the way you expect to work, with a single integrated view of your IT infrastructure. HP OneView delivers a modern, integrated workspace for IT team collaboration. HP OneView is a software-defined management platform that deliberately addresses the challenges of manual operations, human error, and limited extensibility in virtualized BladeSystem and rack server environments. It is an optimal management platform for BladeSystem environments. By capturing processes, configurations, and best-practices in software, HP OneView creates a modern collaborative management approach that automates the deployment and management of infrastructure repeatedly, reliably, and at scale. HP OneView delivers lifecycle management from a single, integrated platform designed for every member of the team to increase their productivity. It facilitates collaboration, removes friction and accelerates time to value. Transform inefficiencies into converged, agile operations that collapse cycle times and eliminate error-prone work. And because HP OneView is designed for open integration with existing tools and processes, it enables you to more effectively pursue your organization's IT objectives. With HP OneView, you'll work smarter-with greater visibility and control-and fully capitalize on the benefits of a converged infrastructure.

Specifikation
