<i>Artnr</i>	077-02574

Microsoft Access is a full-featured relational database management system for the Microsoft Windows operating system. From end users to developers, everyone will agree that it is by far one of the easiest database toolboxes available for this platform. Access is the hard working database that doesn't involve the hard work to maintain and update. Microsoft Access produces the desired result with less effort on your side, which makes routine tasks and complex jobs all that much easier.
